

Wanhao D7 Correction on 16th April 2017
D7 V1.3 to be released on 13th April 2017

D7 Version 1.3 issue		D7 Version 1.4 improvement	
Pic	issue	Pic	Improvement
	<p>1</p> <p>There is one intake 40*40mm fan beside the UV light. The printer is warm during printing.</p>		<p>1</p> <p>We add the 60*60mm fan above the motherboard and on side of printer. The printer is much cooler than before.</p>
	<p>2</p> <p>The power button at front. We have lot issue of LED light.</p>		<p>2</p> <p>We use better switch without LED light.</p>
